# SPORTS MATCH U.K.

Quality Scope Mounts

## About us

Sportsmatch® has been established for over 35 years and has become the best-known manufacturer of scope mounts in the world. We offer a rock solid dependable scope mounting solution for most sporting, hunting and target combinations. Our extensive range of mounts are all produced on the latest CNC machinery available using up to the

minute high tensile materials. These materials and levels of quality assurance can only be equalled by the Aerospace and Formula 1 industries. Users of our mounts range from Professional Vermin Controllers to Army Special Forces and Police Tactical Units. The thing they have in common is that they all depend on Sportsmatch®.

## What mounts do I need?

Where possible we recommend using a Sportsmatch® 1 piece mount. This is not always possible though as bolt action rifles and most pre-charged air rifles

require access to suit the breach. Our 2 piece mounts can be used for such rifles.

## Specifications

Brief specifications are included on the opposite pages. For full details please refer to the colour key and diagram below.

Please note the 'up to lens diameter' dimension can only be used as a guide due to the variation in rifle and scope design. If unsure we suggest checking the 'A' dimension prior to purchase.
